🔒 prakashapr / **Python-Learning** Private

Quick setup — if you've done this kind of thing before

⬇ Set up in Desktop or HTTPS SSH `https://github.com/prakashapr/Python-Learning.git` 📋

Get started by creating a new file or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

…or create a new repository on the command line

```
echo "# Python-Learning" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/prakashapr/Python-Learning.git
git push -u origin master
```

…or push an existing repository from the command line

```
git remote add origin https://github.com/prakashapr/Python-Learning.git
git push -u origin master
```

…or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code

💡 **ProTip!** Use the URL for this page when adding GitHub as a remote.
